Computer Name and Administrator Password

On the **Computer Name and Administrator Password** page, in the Computer name box, a default computer name has been entered. You may change the name to another unique name that identifies the computer in use, such as LINE1 or ALPHALINE. You cannot use spaces or punctuation. If you connect your computer to a network, you will use this computer name to find shared files. If a Administrator is to be used, type a password that you can remember in the **Administrator password** box, and then retype it in the **Confirm password** box. Write the password down and store it in a secure place. Click **Next**. The Administrator password can be left blank.

Date and Time Settings

On the **Date and Time Settings** page, set your Then, click the **Time Zone** down arrow, and select Click **Next**.

Network Settings

Windows XP will spend about a minute configuring the **Networking Settings** Select **Typical Next**.
